Cordoba Agustin María

Front End Developer

Dear employer:

I am writing to demonstrate my interest in the vacancy, because I think I could be a good option for this one. I am currently looking for a job, a few weeks ago I finished my previous job, where I had the opportunity to create several pages for different companies, from e-commerce to pages for a University of Buenos Aires, during the course I was also able to be part of an MFE application created with React, behind this, I made two other pages, all of them freelance with a group of UX and BackEnd Developer, we were able to work with different contact applications such as GIT, Docker, Figma, Notion and Discord, also using the SCRUM methodology of contact with the client and thus be able to extract professionalism from our work, so that when we can access a company it is in the best possible way.

I am still in constant study, I am currently specializing in using Next Js, Mongo Db, Express and TypeScript. I started four years ago studying what I am so passionate about and I will continue this path seeking to become a better professional day by day.

Thank you very much for taking my request into consideration. If you see fit, I would love to discuss my capabilities, position and conditions in more depth in an in-person interview. Feel free to contact me with any questions.

Best Regards,
Agustin María Cordoba
